

The Combi Experience Made Easy.

ComboEaseTM
COMBINATION OVEN-STEAMER

Just That Simple!SM

The job just got easier! Introducing the ComboEase™ from Groen—the combination oven-steamer that takes complexity out of the process. Here's how the ComboEase gets the job done, easily!

• Easy to Sell:

Introductory 30-day, complete guarantee
Two-year extended introductory warranty*
Free start-up
Reliable – patent-pending boilerless technology means fewer things can go wrong
Easy to demonstrate – DVD and online visuals for training support
High quality for less money

• Easy to Order:

One call to an experienced person who knows combi's
Readily available – quick-ship stock units in both stand heights
Units pre-configured for an easy fit

• Easy to Install / Easy on Space:

Zero rear clearance
Easy to move on its own stand with casters
Minimal tools required
36" doorway capability
Stackable – add capacity in same amount of space (factory-built option)

• Easy to Learn:

Under five minutes
No programming necessary
Easy-read user's guide
Easy-to-follow visuals – DVD; website support

• Easy to Operate:

Easy-to-read, intuitive controls
Easy front access to all pans with our side-by-side pan configuration
No interruptions – settings lock during cook cycle
Handy reminder – cook settings reset to the previous setting at the completion of a cycle or when changing modes
Hands-free door latch
Glass door-mounted oven light to always see what's cooking

• Easy on the Pocketbook:

Lower cost of ownership
Lower upfront price tag than most full-size combi's – underutilized features have been eliminated
Significant operational cost savings – patent-pending design allows operation at lower BTU/HR and requires less water
Less expensive to service – made in USA with a simple design and standard components
Reduces worker compensation liability
Increased labor productivity – minimal supervision required
Requires no special chemicals, tools or accessories

• Easy on the Environment:

Minimal water usage – unique boilerless steaming reservoir system requires less water than competitors
Designed to use "green" chemicals – reduce the effects of "grey" water
Low power usage through unique heat-transfer design
Low discharged energy; reduced emissions

• Easy on the Kitchen Staff:

Simple! – unit is forgiving, even the inexperienced can use it
Lack of complexity – simple controls; no programming required
Flexible operation
Very short training cycle – rep demos and online training modules

• Easy to be a Terrific Cook:

Flexible – cook different foods at a common temperature, all at the same time
Ability to produce good food with greater yield
Best production steaming performance of any "boilerless" combi
Even cooking – unique design provides uniform heating throughout the oven
CrispEase™ button enables pleasing crisping and browning

• Easy to Clean and Maintain:

Flexible (3) cleaning options:
– easy daily wipe-down
– spray, press "Clean", let oven do the work
– delimiting (if needed)
No guesswork – easy to see what needs to be cleaned and when
Easy access to boilerless reservoir

• Easy to Service:

Fewer hassles – boilerless technology reduces complexity and service time compared to competitors
Authorized Service Agency (ASA) network; factory-trained
Parts available for same-day repair if necessary; stocked at ASA
Components common to other Groen equipment

• Easy to be Safe:

Ergonomic features such as door handle, door light
Avoid burns with easy-handle pan shelves with safety catch and side-by-side pan configuration
No slip hazard – condensation caught by removable drip pan
No special cleaning chemicals means no exposure to harmful toxins

• Easy on the Eyes:

Quality construction – stays looking good
Large, easy-viewing window
Attractive – clean, contemporary lines
Easy-read control panel
