

We keep your food fresh, safe, *and visible* in school cafeterias — so you can win over your toughest critics.

Randell's exclusive hinged glass cover helps promote your fresh food programs to keep your toughest critics from leaving campus at lunch. When in its open position the cover also serves as your breath guard and eliminates the labor to manage multiple lids. And not only do you have full visibility of product in the top – the base also provides point-of-use backup storage. As a leader in refrigeration technology, we've been trusted for decades to get the job done right for schools. *Isn't it time you learn what other schools already know?* For more information, call **888.994.7636**, or visit us at **www.unifiedbrands.net** and click the K-12 Schools tab to learn more about how Unified Brands can increase participation at your school.
