

POWER SOAK SYSTEM

Power Soak — a continuous motion pot, pan and sheet pan washing system that delivers a consistent clean, improved sanitation, and a more efficient workforce.

Power Soak replaces standard 3-compartment sinks and/or traditional spray type washers. Talk to your dealer about which Power Soak system best fits your needs. Volume, wares material, and size all impact which unit may be optimal for your operation. Units can be built as pre-configured or customized systems that fit any space, including both L- and U-shaped configurations. Exclusive weld-free mechanical field joint available for an easy and economical installation solution where field welding is required but not feasible or preferred. Visit www.unifiedbrands.net/products/power-soak to view our system Configurator or a Labor ROI Calculator.

CHOOSE A MODEL BASED ON THE VOLUME AND SIZE OF YOUR WARES.
