THIS MANUAL MUST BE RETAINED FOR FUTURE REFERENCE. UNDERSTAND AND FOLLOW THE INSTRUCTIONS AND WARNINGS CONTAINED IN THIS MANUAL.

FOR YOUR SAFETY Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.

NOTIFY CARRIER OF DAMAGE AT ONCE It is the responsibility of the consignee to inspect the container upon receipt of same and to determine the possibility of any damage, including concealed damage, Randell suggests that if you are suspicious of damage to make a notation on the delivery receipt. It will be the responsibility of the consignee to file a claim with the carrier. We recommend that you do so at once.

RR REACH-INS

RETAIN THIS MANUAL FOR FUTURE REFERENCE

NOTICE: Due to a continuous program of product improvement, Randell reserves the right to make changes in design and specifications without prior notice.

NOTICE: Please read the entire manual carefully before installation. If certain recommended procedures are not followed, warranty claims will be denied.

MODEL NUMBER	SERIAL NUMBER
ΙΝSΤΔΙ Ι ΔΤΙΩΝ ΠΔΤΕ	

The serial number of all self-contained refrigerators and freezers is located inside the unit on the left hand side near the top on the wall. Always have the serial number of your unit available when calling for parts or service. This manual covers standard units only.

EQUIPMENT DESCRIPTION

Model No.	Solid Door Body Style	V/Hz/Ph	AMPS	Storage Capacity (Cubic Ft.)	HP	NEMA	Approx. Ship Weight (LBS)
RR27RE-S1	Refrigerator	115/60/1	3.0	17.84	1/6	5-15P	306
RR54RE-S2	Refrigerator	115/60/1	4.5	35.68	1/4	5-15P	534
RR27FZ-S1	Freezer	115/60/1	8.0	17.84	1/2	5-15P	328
RR54FZ-S2	Freezer	115/60/1	9.0	35.68	1	5-15P	545

RECEIVING & INSPECTING THE EQUIPMENT

Even though most equipment is shipped crated, care should be taken during unloading so the equipment is not damaged while being moved into the building.

- 1. Visually inspect the exterior of the package and skid or container. Any damage should be noted and reported to the delivering carrier immediately.
- 2. If damaged, open and inspect the contents with the carrier.
- 3. In the event that the exterior is not damaged, yet upon opening, there is concealed damage to the equipment, notify the carrier. Notification should be made verbally as well as in written form.
- 4. Request an inspection by the shipping company of the damaged equipment. This should be done within 10 days from receipt of the equipment.
- 5. Be certain to check the compressor compartment housing and visually inspect the refrigeration package. Be sure lines are secure and base is still intact
- 6. Freight carriers can supply the necessary damage forms upon request.
- 7. Retain all crating material until an inspection has been made or waived.

IMPORTANT - READ FIRST - IMPORTANT

YOUR SAFETY AND THE SAFETY OF OTHERS ARE VERY IMPORTANT.

WE HAVE PROVIDED MANY IMPORTANT SAFETY MESSAGES IN THIS MANUAL AND ON YOUR APPLIANCE. ALWAYS READ AND OBEY ALL SAFETY MESSAGES.

THESE ARE THE SAFETY ALERT SYMBOLS. THESE SYMBOL ALERT YOU TO POTENTIAL HAZARDS THAT CAN KILL OR INJURE YOU AND OTHERS. ALL SAFETY MESSAGES WILL FOLLOW THE SAFETY ALERT SYMBOLS AND EITHER THE WORDS "DANGER", "WARNING" OR "CAUTION".

DANGER MEANS THAT FAILURE TO HEED THIS SAFETY STATEMENT MAY RESULT IN SEVERE PERSONAL INJURY OR DEATH.

WARNING MEANS THAT FAILURE TO HEED THIS SAFETY STATEMENT MAY RESULT IN EXTENSIVE PRODUCT DAMAGE, SERIOUS PERSONAL INJURY, OR DEATH.

CAUTION MEANS THAT FAILURE TO HEED THIS SAFETY STATEMENT MAY RESULT IN MINOR OR MODERATE PERSONAL INJURY, OR PROPERTY OR EQUIPMENT DAMAGE.

ALL SAFETY MESSAGES WILL ALERT YOU TO WHAT THE POTENTIAL HAZARD IS, TELL YOU HOW TO REDUCE THE CHANCE OF INJURY, AND LET YOU KNOW WHAT CAN HAPPEN IF THE INSTRUCTIONS ARE NOT FOLLOWED.

IF THE SUPPLY CORD IS DAMAGED, IT MUST BE REPLACED BY THE MANUFACTURER, ITS SERVICE AGENT OR SIMILARLY QUALIFIED PERSONS IN ORDER TO AVOID A HAZARD.

THIS APPLIANCE IS NOT INTENDED FOR USE BY PERSONS (INCLUDING CHILDREN) WITH REDUCED PHYSICAL, SENSORY OR MENTAL CAPABILITIES, OR LACK OF EXPERIENCE AND KNOWLEDGE, UNLESS THEY HAVE BEEN GIVEN SUPERVISION OR INSTRUCTION CONCERNING USE OF THE APPLIANCE BY A PERSON RESPONSIBLE FOR THEIR SAFETY.

CHILDREN SHOULD BE SUPERVISED TO ENSURE THAT THEY DO NOT PLAY WITH THE APPLIANCE.

THIS APPLIANCE CAN BE USED BY CHILDREN AGED FROM 8 YEARS AND ABOVE AND PERSONS WITH REDUCED PHYSICAL SENSORY OR MENTAL CAPABILITIES OR LACK OF EXPERIENCE AND KNOWLEDGE IF THEY HAVE BEEN GIVEN SUPERVISION OR INSTRUCTION CONCERNING USE OF THE APPLIANCE IN A SAFE WAY AND UNDERSTAND THE HAZARDS INVOLVED. CHILDREN SHALL NOT PLAY WITH THE APPLIANCE. CLEANING AND USER MAINTENANCE SHALL NOT BE MADE BY CHILDREN WITHOUT SUPERVISION.

KEEP THE APPLIANCE AND ITS CORD OUT OF REACH OF CHILDREN LESS THAN 8 YEARS.

DO NOT STORE EXPLOSIVE SUBSTANCES SUCH AS AEROSOL CANS WITH A FLAMMABLE PROPELLANT IN THIS APPLIANCE.

THE APPLIANCE USE FLAMMABLE INSULATION BLOWING GAS C5H10, DISPOSAL OF THE APPLIANCE SHALL IN ACCORDANCE WITH THE REGULATIONS OF LOCAL AUTHORITIES.

THE KEY FOR APPLIANCE ELECTRIC BOX SHOULD BE SAFE KEPT BY QUALIFIED PERSONS IN ORDER TO AVOID A HAZARD.

WARNING: KEEP VENTILATION OPENINGS, IN THE APPLIANCE ENCLOSURE OR IN THE BUILT-IN

STRUCTURE, CLEAR OF OBSTRUCTION.

WARNING: DO NOT USE MECHANICAL DEVICES OR OTHER MEANS TO ACCELERATE THE DEFROSTING PROCESS, OTHER THAN THOSE RECOMMENDED BY THE

MANUFACTURER.

WARNING: DO NOT DAMAGE THE REFRIGERANT CIRCUIT.

WARNING: DO NOT USE ELECTRICAL APPLIANCES INSIDE THE FOOD STORAGE COMPARTMENTS
OF THE APPLIANCE, UNLESS THEY ARE OF THE TYPE RECOMMENDED BY THE

MANUFACTURER.

WARNING: HANDLING, MOVING, AND USE OF THE REFRIGERATOR OR FREEZER TO AVOID EITHER DAMAGING THE REFRIGERANT TUBING, OR INCREASING THE RISK OF A

LEAK.

CAUTION: RISK OF FIRE OR EXPLOSION DUE TO FLAMMABLE REFRIGERANT USED. FOLLOW HANDLING INSTRUCTIONS CAREFULLY IN COMPLIANCE WITH U.S. GOVERNMENT

REGULATIONS.

CAUTION: COMPONENT PARTS SHALL BE REPLACED WITH LIKE COMPONENTS AND THAT SERVICING SHALL BE DONE BY FACTORY AUTHORIZED SERVICE PERSONNEL, SO AS TO MINIMIZE THE RISK OF POSSIBLE IGNITION DUE TO INCORRECT PARTS OR

IMPROPER SERVICE.

CAUTION: RISK OF FIRE OR EXPLOSION DUE TO PUNCTURE OF REFRIGERANT TUBING; FOLLOW

HANDLING INSTRUCTIONS CAREFULLY. FLAMMABLE REFRIGERANT USED.

DANGER: RISK OF CHILD ENTRAPMENT. BEFORE YOU THROW AWAY YOUR OLD REFRIGERATOR OR FREEZER: TAKE OFF THE DOORS. LEAVE THE SHELVES IN PLACE SO THAT

CHILDREN MAY NOT EASILY CLIMB INSIDE.

INSTALLATION

NOTE: UNIT REPAIRS WILL NOT BE SUBJECT TO STANDARD UNIT WARRANTIES IF DUE TO IMPROPER INSTALLATION PROCEDURES.

DANGER: THE UNIT MUST BE TURNED OFF AND DISCONNECTED FROM THE POWER SOURCE WHENEVER PERFORMING SERVICE, MAINTENANCE FUNCTIONS OR CLEANING THE REFRIGERATED AREA.

SELECTING A LOCATION FOR YOUR NEW UNIT

Units represented in this manual are intended for indoor use only. Be sure the location chosen has a floor strong enough to support the total weight of the cabinet and contents. A fully loaded unit can weigh as much as 1500 pounds. Reinforce the floor as necessary to provide for maximum loading. For the most efficient refrigeration, be sure to provide good air circulation inside and out.

INSIDE CABINET

Do not pack the units so full that air cannot circulate. The refrigerated air is discharged at the top rear of the unit. It is important to allow for proper air flow from the top rear to the bottom of the unit. Obstructions to this air flow can cause evaporator coil freeze ups and loss of temperature or overflow of water from the evaporator drain pan. The shelves have a rear turn up on them to prevent this. However, bags and other items can still be located to the far rear of the cabinet. Air is brought into the evaporator coil with fans mounted to the front of the coil.

OUTSIDE CABINET

Be sure that the unit has access to ample air. Avoid hot corners and locations near stoves and ovens. It is recommended that the unit be installed no closer than 2" from any wall with at least 12" of clear space above the unit.

LEVELING

A level cabinet looks better and will perform better because the doors will line up with the frames properly. Use a level to make sure the unit is level from front to back and side to side. Units supplied with legs will have adjustable bullet feet to make the necessary adjustments. If the unit is supplied with casters, no adjustments are available. Ensure the floor where the unit is to be located is level.

STABILIZING

All models are supplied with casters for your convenience. It is very important, however, that the cabinet be installed in a stable condition with the front wheels locked while in use. Should it become necessary to lay the unit on its side or back for any reason, allow at least 24 hours before start-up to allow compressor oil to flow back into place. Failure to meet this requirement can cause compressor failure and unit damage.

ELECTRICAL CONNECTION

Refer to the amperage data on page 1, the serial tag, your local code or the National Electrical Code to be sure the unit is connected to the proper power source.

OPERATION

CAUTION: DO NOT THROW ITEMS INTO THE STORAGE AREA. FAILURE TO HEED THESE RECOMMENDATIONS COULD RESULT IN DAMAGE TO THE INTERIOR OF THE CABINET.

REFRIGERATED CYCLE

Refrigerators

During the refrigeration cycle, the evaporator fans will run continuously even when one or more doors are open. The door switch will activate the lights when opened.

- Every 6 hours, the refrigeration system will turn off to allow the evaporator coil to defrost. The controller now displays defrost symbol. When the coil temperature reaches 41°F or after 20 minutes of defrost, the unit will turn on again.
- Anti-condensation heaters on door frames work in conjunction with the compressor.
- 3. The factory setting for the temperature range is 34°F to 38°F.

Freezers

During the refrigeration cycle, the controller supplies power to the condensing unit and evaporator fan motors. The evaporator fans will run at any time when the evaporator coil temperature is below 54° F. They will also keep running when door is open but cycle off during a defrost period. The door switch will activate the lights when opened.

- Every 6 hours, the refrigeration system will turn off and electric heater will turn on to defrost the evaporator coil. The controller now displays the defrost symbol. When the coil temperature reaches 45°F or after 20 minutes of defrost, the unit will turn on again.
- Anti-condensation heaters on door frames work in conjunction with the compressor.
- 3. The factory setting for temperature range is -7 to -3°F.

SOLID-STATE THERMOSTAT DESCRIPTIONS

Front Panel Commands

SET: To display target set point; in programming mode it selects a parameter or confirm an operation.

★ (DEF): To start a manual defrost.

(UP): To view the last alarm occurrence; in programming mode it browses the parameter codes or increases the display value.

▼ (DOWN): To view the last alarm occurrence; in programming mode it browses the parameter codes or decreases the display value.

★ + ▼: To lock and unlock the keyboard.

SET + ▼: To enter in programming mode.

SET + A: To return to the room temperature display.

(1): To switch the instrument off.

LED	MODE	DEFINITION	
*	ON	Compressor enabled	
	FLASHING	Anti-short cycle delay enabled (AC parameter)	
**	ON	Defrost in progress	
	FLASHING	Dripping in progress	
S,	ON	Fans output enabled	
	FLASHING	Fans delay after defrost	
°C	ON	Measurement unit	
	FLASHING	Programming mode	
°F	ON	Measurement unit	
	FLASHING	Programming mode	

Main Functions

- 1. HOW TO SEE THE SET POINT
 - Push and immediately release the SET key: the display will show the set point value.
 - Push and immediately release the SET key or wait for 5 seconds to display the sensor value again.
- 2. HOW TO CHANGE THE SET POINT
 - a. Hold the SET key for more than 2 seconds to change the set point value.
 - b. The value of the set point will be displayed and the LED starts blinking.
 - c. To change the set value, push the ◆ or ▼ key within 10s.
 - d. To set new point value, push the SET key again or wait 10s.
- 3. HOW TO START A MANUAL DEFROST
 - a. Hold the key for more than 2 seconds and a manual defrost will start
- 4. HOW TO LOCK THE KEYBOARD
 - a. Hold the A and keys together for more than 3s.
 - b. The "POF" message will be displayed and the keyboard will be locked. At this point, it will be possible only to see the set point or the MAX or Min temperature stored.
 - c. If a key is pressed more than 3s the "POF" message will be displayed.
- 5. HOW TO UNLOCK THE KEYBOARD
 - a. Hold the and keys together for more than 3s until the "POF" message is displayed.

Alarm Signals

- 1. HOW TO SEE THE ALARM AND RESET THE RECORDED ALARM
 - a. Push the or vextrm{key to display the alarm signals.}
 - b. When the signal is displayed, hold the SET key until the "rst" message is displayed, and push the SET key again. The "rst" message starts blinking and the normal temperature will be displayed.

MESSAGE	CAUSE	OUTPUTS
"P1"	Room probe failure	Compressor output according to par "Con" and "COF"
"P2"	Evaporator probe failure	Defrost end is timed
"HA"	Maximum temperature alarm	Outputs unchanged
"LA"	Minimum temperature alarm	Outputs unchanged
"dA"	Door open	Compressor and fans restart
"EA"	External alarm	Output unchanged
"CA"	Serious external alarm (i1F=bAL)	All outputs OFF
"CA"	Pressure switch alarm (i1F=PAL)	All outputs OFF

MAINTENANCE

DANGER: THE UNIT MUST BE TURNED OFF AND DISCONNECTED FROM THE POWER SOURCE WHENEVER PERFORMING SERVICE, MAINTENANCE FUNCTIONS OR CLEANING THE REFRIGERATED AREA.

DANGER: NEVER USE A HIGH PRESSURE WATER WASH FOR THIS CLEANING PROCEDURE AS WATER CAN DAMAGE THE ELECTRICAL COMPONENTS LOCATED NEAR OR AT THE CONDENSER COIL.

DANGER: NEVER USE STEEL PADS, WIRE BRUSHES OR SCRAPERS!

CAUTION: NEVER USE AN ACID BASED CLEANING SOLUTION MANY FOOD PRODUCTS HAVE AN ACIDIC CONTENT WHICH CAN DETERIORATE THE FINISH. BE SURE TO CLEAN THE STAINLESS STEEL SURFACES OF ALL FOOD PRODUCTS.

REFRIGERATORS AND FREEZERS

The interior and exterior can be cleaned using soap and warm water. If this isn't sufficient, try ammonia and water or a nonabrasive liquid cleaner. When cleaning the exterior, always rub with the "grain" of the stainless steel to avoid marring the finish

Do not use an abrasive cleaner because it will scratch the stainless steel and plastic and can damage the breaker strips and gaskets.

CLEANING THE CONDENSER COIL

The condenser coil requires regular cleaning and it is recommended every 90 days. In some instances, you may find that there is a large amount of debris and dust or grease accumulated prior to the 90 day time frame. In these cases the condenser coil should be cleaned every 30 days.

If the build up on the coil consists of only light dust and debris, the condenser coil can be cleaned with a simple brush. Heavier dust build-up may require a vacuum or even compressed air to blow through the condenser coil.

If heavy grease is present, there are de-greasing agents available for refrigeration use and specifically for the condenser coils. The condenser coil may require cleaning with the de-greasing agent and then blown through with compressed air.

Failure to maintain a clean condenser coil can initially cause high temperatures and excessive run times. Continuous operation with dirty or clogged condenser coils can result in compressor failures. Neglecting the condenser coil cleaning procedures will void any warranties associated with the compressor or cost to replace the compressor.

STAINLESS STEEL CARE AND CLEANING

To prevent discoloration of rust on stainless steel several important steps need to be taken. First, we need to understand the properties of stainless steel. Stainless steel contains 70-80% iron which will rust. It also contains 12-30% chromium which forms an invisible passive film over the steels surface which acts as a shield against corrosion. As long as the protective layer is intact, the metal is still stainless. If the film is broken or contaminated, outside elements can begin to breakdown the steel and begin to form rust of discoloration. Proper cleaning of stainless steel requires soft cloths or plastic scouring pads.

Cleaning solutions need to be alkaline based or non-chloride based. Any cleaner containing chlorides will damage the protective film of the stainless steel. Chlorides are commonly found in hard water, salts, and household and industrial cleaners. If cleaners containing chlorides are used, be sure to rinse and dry thoroughly.

Routine cleaning of stainless steel can be done with soap and water. Extreme stains or grease should be cleaned with a non-abrasive cleaner and plastic scrub pad. It is always good to rub with the grain of the steel. There are also stainless steel cleaners available which can restore and preserve the finish of the steel's protective layer.

Early signs of stainless steel breakdown can consist of small pits and cracks. If this has begun, clean thoroughly and start to apply stainless steel cleaners in attempt to restore the passivity of the steel.

GASKET MAINTENANCE

Gaskets require regular cleaning to prevent mold and mildew build up and also to keep the elasticity of the gasket. Gasket cleaning can be done with the use of warm soapy water. Avoid full strength cleaning products on gaskets as this can cause them to become brittle and prevent proper seals. Do not use sharp tools or knives to scrape or clean the gasket which could possibly tear the gasket and rip the bellows.

Gaskets can easily be replaced and don't require the use of tools or authorized service technicians. The gaskets are "Dart" style and can be pulled out of the grove in the door and replaced by pressing the new one back into place.

DOORS/HINGES

Over time and with heavy use, door hinges may become loose. If the door is beginning to sag, tighten the screws that mount the hinge brackets to the frame of the unit. If the doors are loose or sagging, this can cause the hinge to pull out of the frame which may damage both the doors and the door hinges.

DRAIN MAINTENANCE

Each unit has a drain located inside the unit which removes the condensation from the evaporator coil and drains it into an external condensate evaporator pan. Drain line can become loose or disconnected from moving or bumping the drain tube. If you notice excessive water accumulation on the inside of the unit, be sure the drain tube is connected from the evaporator housing to the condensate evaporator drain pan. If water starts to collect underneath the unit, you may want to check the condensate evaporator drain tube to be sure it is still located inside the drain pan. The leveling of the unit is important as the units are designed to drain properly when on a level surface, if your floor is not level, this can also cause drain problems. Be sure all drain lines are free of obstructions because this may cause water to back up and overflow the drain pans.

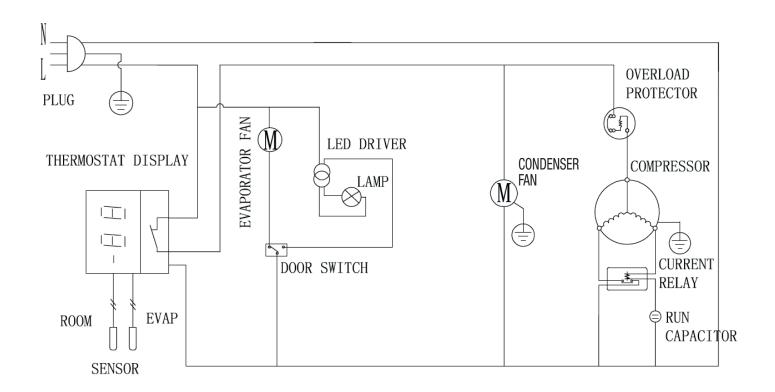

REPLACEMENT PARTS

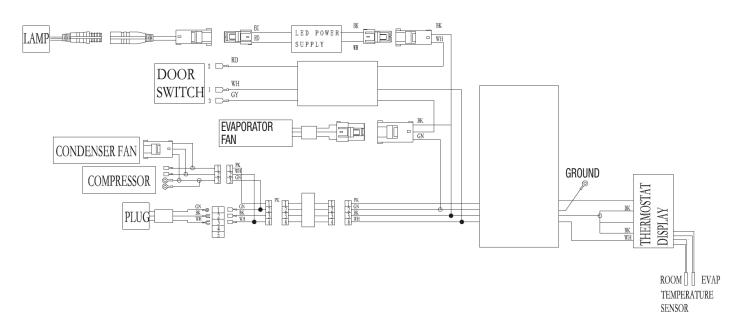

To order parts, contact your Authorized Service Agent. Supply the model designation, serial number, part description, part number, quantity, and when applicable, voltage and phase.
