

A SMARTER FOOD SHIELD

Less Complexity. More Strength. Total Flexibility.

Our new food shields solve the real challenges operators face with traditional designs—and deliver a cleaner, stronger, easier-to-use solution.

- ✓ **One Simplified Platform.** All models are fully convertible and adjustable, reducing SKUs while increasing flexibility.
- ✓ **Built to Last.** A rigid, robust design improves durability and withstands shipping, installation, and daily use.
- ✓ **Effortless Conversion.** Easily convert from full-service to self-service with one-person functionality—fast, intuitive, and reliable.
- ✓ **Improved Cleanability.** Designed-in clearances provide easy access for cleaning, saving time and improving hygiene.
- ✓ **Extended Coverage.** A longer horizontal span with no center post delivers better visibility, cleaner sightlines, and easier service.
- ✓ **NSF-Compliant Smart Design.** Side panels required for NSF self-service tuck away neatly with the front glass when converted to full-service—maintaining compliance without added clutter.
- ✓ **Exceptional Value.** A highly competitive price point compared to shields with similar functionality—without sacrificing quality.
